2025-2026

Introduction : The Milanese Student Housing Crisis: A 191,000 Bed Deficit

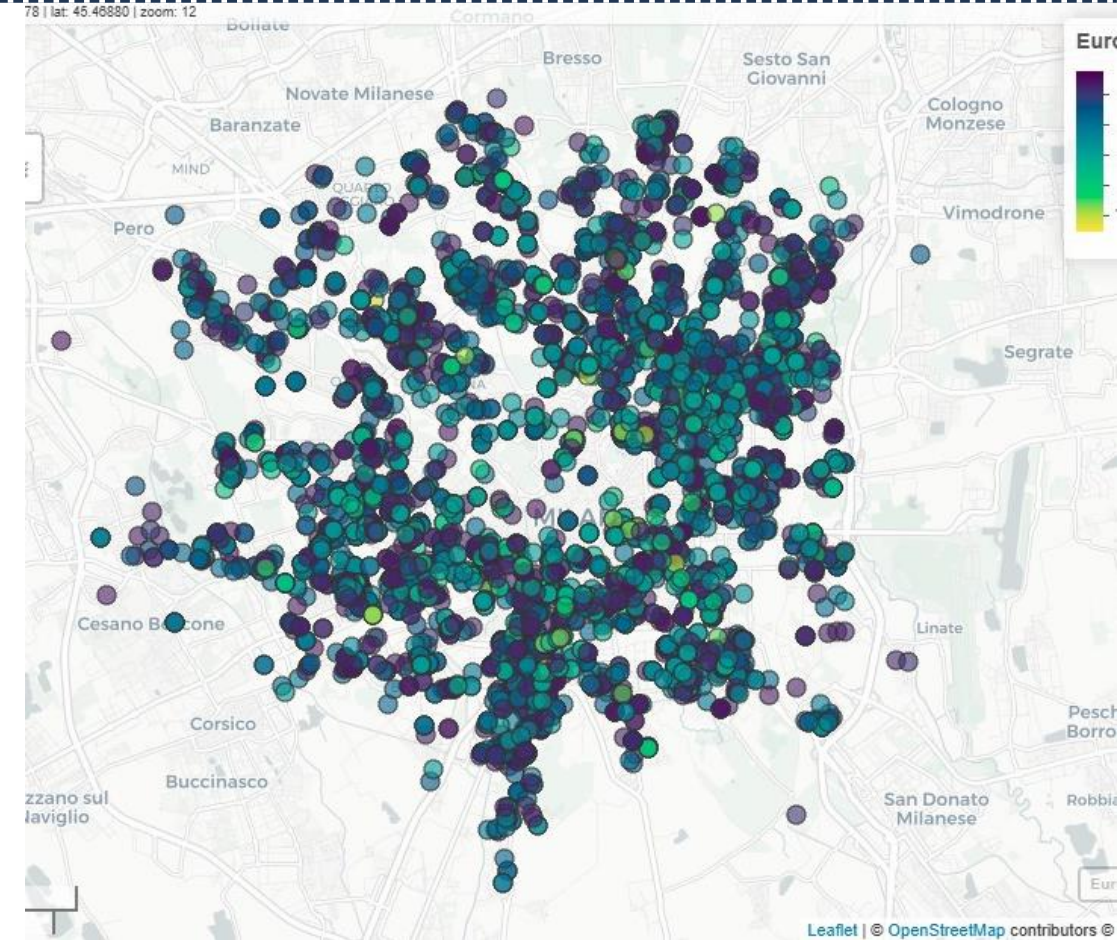

- **2023 Tent Protests** : A nation-wide outcry against +10.1% rent hikes.
- **Reality** : 207,000 students vs. only 16,000 dedicated beds.
- **Low wages + Inflation + Short-term rental (AirBnb) squeeze** = A market Perfect Storm where students are priced out of their own education.
- **Public Policy** : Milano Cortina Olympic Village 2026 adds 1,700 beds - meeting only 6% of current unmet demand.

Politecnico Di Milano 2023. [Reuters](#).

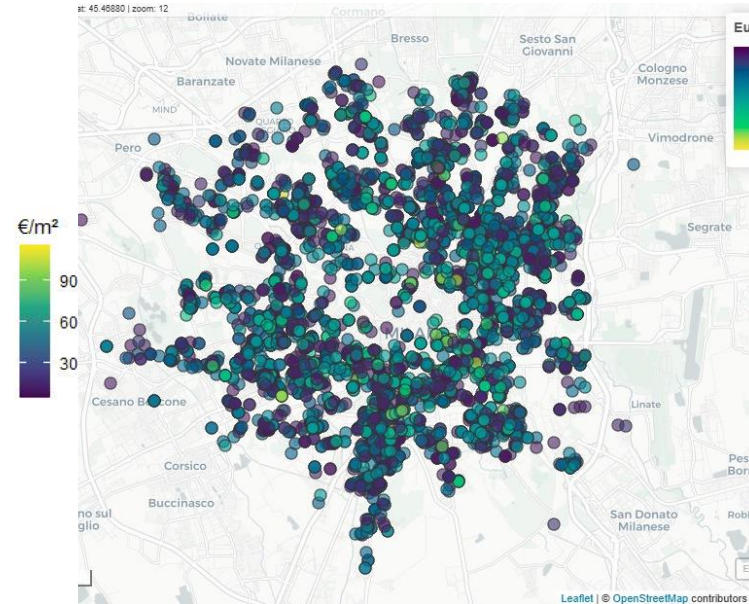

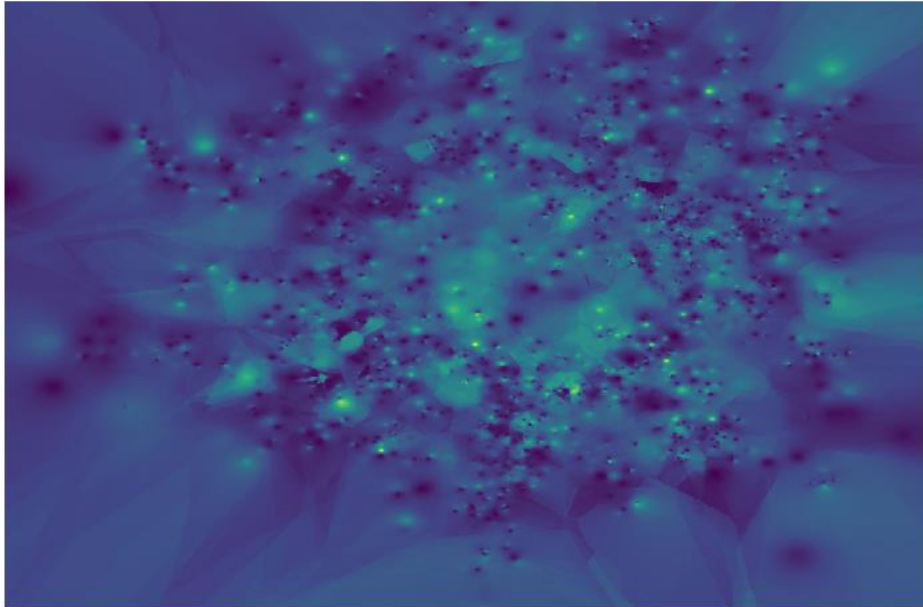

- **Extracted Features** : "price" - "N_rooms" - "N_bathrooms" - "surface" - "floor" - "heating" - "features" - "address" - "macrozone" - "microzone" - "price_sqm".
- 5363 data instances.
- One hot encoding of categorical features like Presence of heating – balcony

Data extracted from Immobiliare. 2026.

Geographical Attractors & Rent Decay

- Bid-Rent Theory : CBD
- Student Bubble (University Proximity)
- Accessibility as price buffer

- Rent Price Decay as distance increases farther from Duomo.

Comune di Milano

OpenData

Il Comune di Milano individua nel paradigma dell'Open Government una via per creare una Pubblica Amministrazione aperta e che dia vigore all'innovazione nei confronti di cittadini ed imprese: gli open data rappresentano uno dei capitali di tale strategia. Il principio fondamentale degli open data è che i dati pubblici, nel rispetto della normativa vigente, appartengono alla collettività e come tali devono essere ri-utilizzabili da chiunque ne abbia interesse.

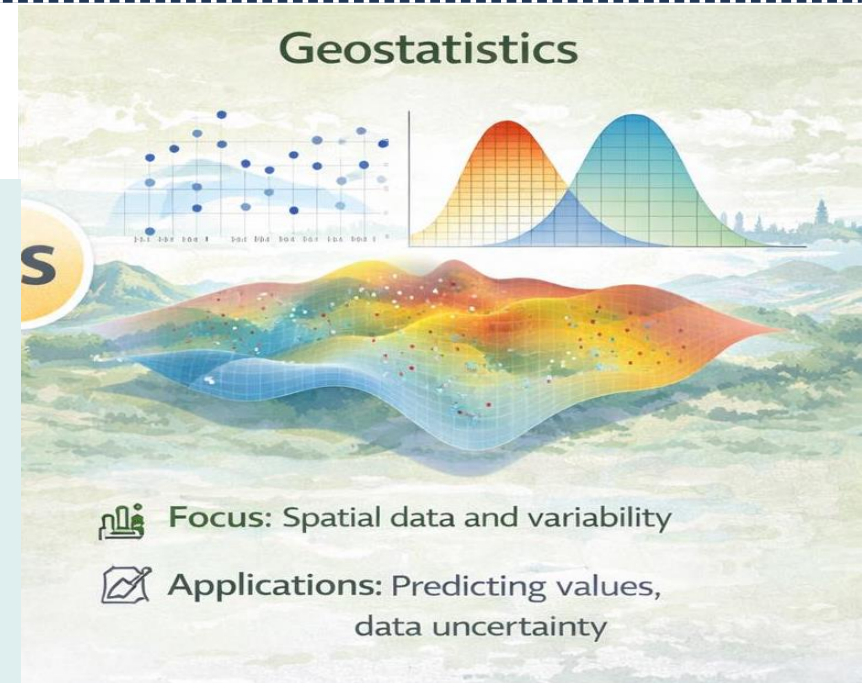

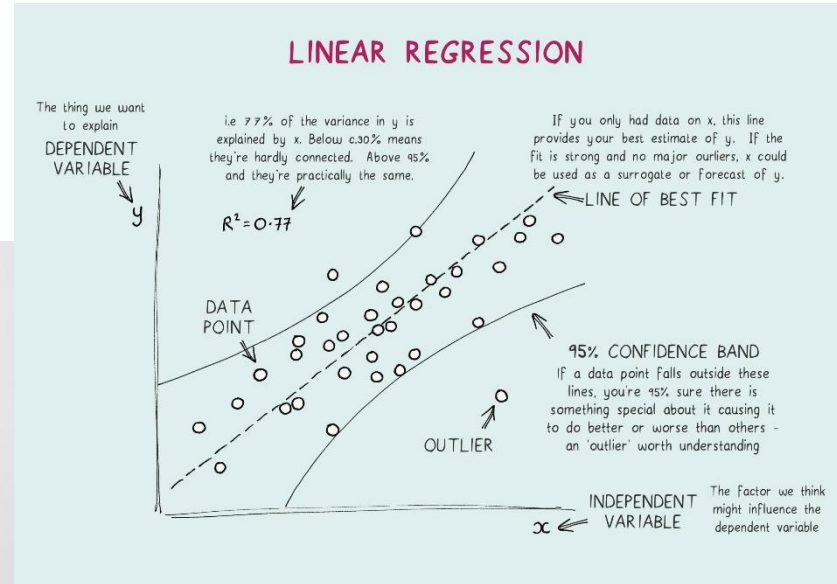

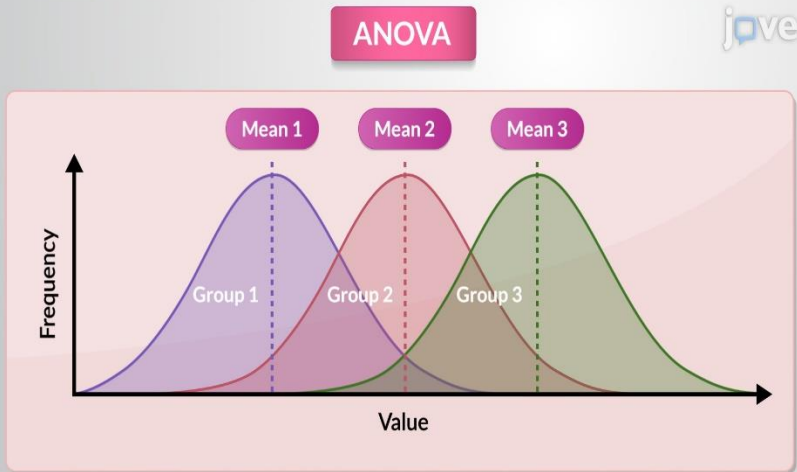

Consulta i dati TUTTI I DATI

Agricoltura, pesca, silvicoltura e prodotti alimentari	Economia e finanze	Istruzione, cultura e sport	Energia	Ambiente
Governo e settore pubblico	Salute	Tematiche internazionali	Giustizia, sistema giuridico e sicurezza pubblica	Regioni e città
Popolazione e società	Scienza e tecnologia	Trasporti		

I dati possono essere utilizzati secondo il sistema di licenze "Creative Commons", consentendo all'utente la possibilità di riprodurre, distribuire, trasmettere e adottare liberamente e gratuitamente i dati, anche a scopi commerciali, a condizione che venga citata la fonte laddove necessario.

Modelling Approach needs to take into account Spatial Data complementary to decision making process in housing process.

- Metro Stations
- Walkability (Network distances instead of Euclidian)
- proximity to work
- School quality
- safety (crime rates)
- access to amenities

What Does Success look like for our project ?

1. Room-Finding Guide

- a) Goal : data-driven compass to navigate Milan's rental market.*
- b) Outcome: Systematics Identification of trade-offs*

2. The Urban Planning Heatmap

- a) Goal: Mapping transit infrastructure and housing cost to guide future development.*
- b) Outcome: strategic locations for future student residences.*

Thank you for you attention and see you soon !
